APPLICATION FOR A PATENT AND ACKNOWLEDGEMENT

[Section 30 (1)-Regulation 40]

(See notes overleaf)

The grant of a patent is hereby requested by the undermentioned applicant on the basis of the present application filed in duplicate.

Official Application No. **2003/4164**

Applicant's or agent's reference
seal/1

(ii) Full name(s) of applicant(s) **Petrus Jacobus Pieterse Delpot
Jacobus Marthinus Barnard**

(iii) Address(es) of applicant(s) **Fuchsia Steet 35, Karinpark, Pretoria
Eeufees Road 104, Pretoria North Pretoria**

(iv) Title of invention **Seal-a-can**

(v) The applicant claims priority as set out on the accompanying form P 2.

(vi) This application is for a patent of addition to Patent Application No. **[redacted]**

(vii) This application is a fresh application in terms of section 37 and based on Application No. **21 [redacted]**

(viii) This application is accompanied by:

- | | | |
|---|-----|---|
| X | 1. | A single copy of a provisional or two copies of a complete specification of one pages. |
| | 2. | Drawings of sheets. |
| | 3. | Publication particulars and abstract (form P 8 in duplicate). |
| | 4. | A copy of Figure of drawings (if any) for the abstract. |
| | 5. | An assignment of invention. |
| | 6. | Certified priority document(s) (state number). |
| | 7. | Translation of the priority document(s). |
| | 8. | An assignment of priority rights.. |
| X | 9. | A copy of the form P 2 and the specification of S.A. Patent Application [redacted] |
| | 10. | A declaration and Power of Attorney on form P 3. |
| | 11. | Request for ante-dating on form P 4. |

“ Seal-a-can “

Rotating Container Valve / Diaphragm / Seal

This inner valve/diaphragm/seal is a new closing mechanism designed to close a container opening from preferably inside by a preferably rotating plastic/ rubber or other suitable material valve/diaphragm/ seal.

The rotating action will preferably be manipulated from the outside of the container volume area. The inside valve/diaphragm/seal will be designed to close the opening hole when a container is already opened at such a hole. The material used to close this hole will preferably be contributing to the successful working of the mentioned valve/diaphragm/seal.

The attachment between the inside valve/diaphragm/seal and the outside opening mechanism will preferably be used to conduct the rotating or closing motion to the best closing condition.

Petrus Jacobus Pieterse Delpont.

Jacobus Marthinus Barnard
